

A comprehensive directory of specialists, clinics, and crisis interventions for federal care facilities (BBE) in Austria.

"This directory was created to facilitate access to necessary medical support for trans individuals and HIV-positive refugees. Here you will find helpful information to contact the appropriate specialists and organizations."

In collaboration with:

"Directory for trans individuals and HIV-positive refugees: Access to medical support"

In a time when medical care poses challenges for many, it is especially crucial to ensure that trans* individuals and HIV-positive refugees have access to the necessary treatments and medications. These groups often face specific barriers, such as discrimination, language obstacles, or a lack of specialized healthcare providers. This directory serves as a valuable resource to help these target groups maintain consistent and reliable healthcare.

Target Group

This directory is aimed at:

- Trans* individuals requiring ongoing hormone replacement therapy (HRT).
- HIV-positive refugees needing continuous medical care and therapy.

Content

The directory contains a carefully curated selection of healthcare professionals known for their sensitivity and expertise in hormone replacement therapy and HIV treatment. All listed professionals are familiar with the unique needs and challenges faced by trans* individuals and HIV-positive refugees. The selection is based on recommendations from community organizations and patient testimonials to ensure that the listed practices provide a respectful and supportive environment.

In addition to healthcare professionals, the directory includes health centers and clinics specializing in the treatment of trans* individuals and HIV-positive people. These centers often offer comprehensive services, including:

- Medical treatments.
- Psychological counseling.
- Peer-support groups.
- Legal assistance.

Receiving care in such an inclusive environment can be a significant relief for many.

Furthermore, the directory provides emergency contacts for quick access during medical crises. These include emergency hotlines and 24/7 support services to ensure that affected individuals receive the help they need in critical situations.

Overall, this directory is a vital step in facilitating access to medical support for trans* individuals and HIV-positive refugees. It aims to break down barriers and improve healthcare for these vulnerable groups. We hope this directory will not only serve as a helpful resource but also raise awareness of the specific needs and challenges faced by trans* individuals and HIV-positive refugees. Our goal is to promote inclusive and equitable healthcare for all.

Important Notes

- It is recommended to schedule an appointment in advance and communicate specific needs beforehand.
- Interpreter services can be utilized if necessary to ease communication.

Medical Specialists

Lower Austria

Dr. Ulrike Giwiser

Specialty: General Medicine

Address: Parkstraße 7, 2340 Mödling

Phone: +43 2236 24386

Email: ordination@dr-giwiser.at
